

Welcome to our house-warming!

Repona would like to invite all our friends to celebrate our new larger offices in central Lund and the fact that we have grown to 22 people. This will take place on Thursday October 15th starting at 16.00.

Between the hours of 16 and 18, a seminar will be held:

**BI – Business Intelligence in focus,
Benny Persson**

Within BI flourishes a lot of terms and abbreviations and for the uninitiated, they may sound very cryptic and difficult to understand. Let us sort it out. What is the difference between BI and BW? What is the business value?

**Get more time and money for development using Repona support,
Lotta Möllebäck**

With smooth flexible help tailored to your requirements, a major part of your IT budget can be allocated to development. Lotta will tell you how this is done.

**Restructuring of Bergendahls article registry and product data management,
Per Alfsson**

With consistent information across the organization, BergendahlsGruppen will get unprecedented opportunities to manage their information and product range all the way out to the stores.

**Bergendahls and Citygross into the future - to win the low-hanging fruit using SAP,
Sebastian Green, Development manager BergendahlsGruppen**

BergendahlsGruppen is in an intensive stage of development, both in the market and internally. How do we win the war on the market? How do we best exploit the advantages of our SAP system?

At 18:00 we open the doors to the buffet with a Mediterranean theme. We promise a lot of entertainment and exciting contests throughout the evening.

RSVP by Monday October 5th by email to susan.grant@repona.com. Please indicate if you will attend the seminar and also **feel free to invite other colleagues.**

On the map below you can see how to get to Repona. If you are driving then a good tip is to park at Mårtenstorget or on the Domus House roof.
